NEC

Built In Facility Management and Guest Services

With a powerful array of Hotel/Motel management features built right in, the i-Series co-ordinates your essential services and puts convenient guest features only an arm's length away.

- Do Not Disturb
- DSS Console Monitoring
- Flexible Numbering Plan
- Message Waiting
- Room Status
- Room Status Printouts
- Room to Room Call Restriction
- Single Digit Dialing
- Toll Restriction (when Checked-in)
- Wake Up Call

Property Management System Integration (PMSi)

Use your i-Series as the cornerstone of a fully integrated lodging management system team.

Add the NVM-Series with optional lodging software for basic Hotel/Motel Voice Mail services. Check-in at the front desk automatically activates a guest's mailbox, while check-out archives unanswered messages. In addition, each guest has a handy Wake Up Call (with snooze alarm) and a first time tutorial to guide them through the Voice Mail features.

For more sophisticated applications, PMSi allows your i-Series telephone system, optional NVM-PMSi Voice Mail and third-party PMS system to work together in providing an unparalleled level of facility management. Using unique Message Bus technology, the PMSi team automates many routine facility management tasks by instantly exchanging room status, guest services and call record data. For example, check in a guest at the reservation terminal and automatically update room status, call restriction and enable the guest's mailbox. At check-out, the PMSi team works together to notify housekeeping, add outside call charges to the guest's bill and automatically deactivate their mailbox.

Some features may not be applicable to all systems. The information contained herein is subject to change without notice at the sole discretion of NEC America, Inc.
